1976 HOUSE OF REPRESENTATIVES CAMPAIGNS

CONTENTS

This is the ninth Report in the FEC Disclosure Division Series. It covers the financial activity of 860 candidates of the U.S. House of Representatives all of whom appeared on the General Election ballot. Due to the great number of candidates for the House, only those receiving 5% or more of the vote in the General Election are included in this study. These include 433 Democrats, 390 Republicans, and 37 Independent and minor party candidates.

The House study reflects a reasonably accurate picture of the financial activity of the campaigns during 1975-76 for elections to the U.S. House of Representatives. This report covers all campaign finance activity during the period January 1, 1975 through December 31, 1976. The figures therefore represent all financial activity which may cover one or possibly more than one election. Specific totals for a primary, special, run-off or general election may be derived from itemized figures reported by the individual candidates, their principal campaign committee and all other authorized committees. The figures extracted from these have been adjusted so that totals are not inflated by such items as refunds, loan repayments and transfers between a candidate and his/her authorized committee(s). Since the figures used in this study are as reported, they are subject to amendment as a result of a committee's own internal review or by FEC audit.

Of major importance in understanding and using this report is an awareness of the complexities of the reporting requirements of the Federal Election Campaign Act of 1971, as amended, and the fact that most of the treasurers in House campaigns are volunteers, many of whom were new to political campaigns. As a result of these factors, candidate and/or committee reporting was of a quality which would require a great deal of research and analysis to derive statistics which would equitably represent the scope of each campaign.

In using this study it should be remembered that while it provides a great deal of information, it is not meant to be a substitute for the actual reports on file at the Commission. Anyone desiring in-depth knowledge of any campaign should use the reports filed by the candidates and committees in an election.

All reports are available for public review and/or copying at the Federal Election Commission, "Provided, that any information copies from such reports and statements shall not be sold or utilized by any person for the purpose of soliciting contributions or for any commercial purpose." (2 U.S.C. Section 438(a)(4))

DEFINITIONS

INDIVIDUAL CONTRIBUTIONS:

\$0 to and including \$100: This category includes contributions in these amounts and total unitemized contributions.

\$101 - \$499: This category includes all contributions reported in these amounts.

\$500 and over: This category includes all contributions reported in these amounts. The number of contributions (not contributors) in this category is included in this study.

Contributions From the Candidates: This category includes contributions made directly by the candidates but does not include loans from the candidates.

POLITICAL COMMITTEE CONTRIBUTIONS:

Party - This category includes total monies received from Party Related Political Committees.

Non-Party - This category includes total monies received from Non-Party Related Political Committees.

LOANS:

Candidate Loans - This category includes the aggregate total of all loans received from or endorsed by the candidate. The study also lists any amount repaid, where applicable.

Other Loans - This category reflects the aggregate total of all loans received from sources other than the candidate. The study also lists any amount repaid, where applicable.

TOTAL RECEIPTS ADJUSTED:

This category includes contributions received from individuals, party committees, non-party committees, loans, interest, and miscellaneous income. Total receipts adjusted does not include refunds, rebates, returned contributions, loan repayments, treasury notes and certificates of deposits which have been bought and redeemed.

TOTAL EXPENDITURES ADJUSTED:

This category includes total reported expenditures less refunds, rebates, returned contributions, loan repayments, treasury notes and certificates of deposits which have been bought and redeemed. Transfers between affiliated committees or transfers between a candidate and his or her authorized committees have been netted out when those transfers resulted in duplicate accounting. Any expenses not related to the 1976 campaign have also been excluded, therefore no debt committees are included in this study.

Because this study is based solely on reports filed by a candidate and his/her authorized political committee(s), the Total Expenditures Adjusted do not include expenditures reported by the national political parties; persons making independent expenditures; communication costs of corporations, labor and membership organizations; trade associations. Office accounts which are clearly identified as non-campaign accounts have not been included even though they are presently registered as political committees.

CASH ON HAND: (As of December 31, 1976)

This figure is taken directly from the total(s) listed on the 1976 Year End Report. In a number of instances negative figures were reported.

SURPLUS/DEFICIT:

This figure is calculated by combining debts owed to or by the committee with their Cash on Hand at the end of 1976.
